2021
YEAR END **SUMMARY**

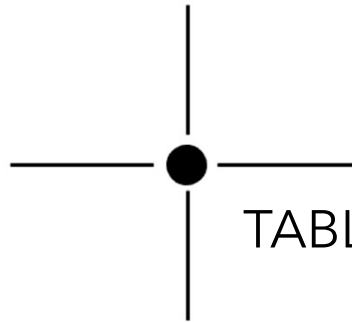

TABLE OF **CONTENTS:**

- EVENTS AND IMPACT OF 2021
- FINANCIAL HIGHLIGHTS
- LOOKING TO 2022
- FINAL ADMINISTRATIVE TASKS

EVENTS AND IMPACT: 2021

PHILOSOPHY DRIVING A PLATFORM AND PRODUCTS.

With 2020 devoted to helping the worldwide network of makers combat the COVID-19 crises, 2021 saw a slow transition into development of the many assets RPrime created during that time. The opportunity to focus on Intellectual Property, and harness the brain-power of the rag-tag team of interns in order to further creating potential products – such as Axial Growth Printing – that foster partnerships to bring these ideas to market.

At the same time, our Platform efforts increased with our involvement in the Behavior Health arena through BH360.org, as well as our partnership with the American Conservation Coalition and it's effort in creating support for Climate Change initiatives within Washington DC.

The tremendous amount of intellect, advancement, and potential improvement to lives worldwide all support the RPrime goals of relationship, partnership, and creating a movement of reconciliation in what continues to be a very difficult and volatile time in history.

EVENTS: PRODUCTS 2021

As we entered 2021, it became clear that our Maker Mask college aged teams were not heading back to their universities until September at the earliest. This gave us the opportunity to wind down Maker Mask production, and move many of the team members to RPrime Labs projects.

In June of 2021, Rory invented an entirely new 3D printing method called Axial Growth Printing. After quickly building a fully functional prototype, the RPrime Labs team moved into two “proof of concept” categories: medical and electronic.

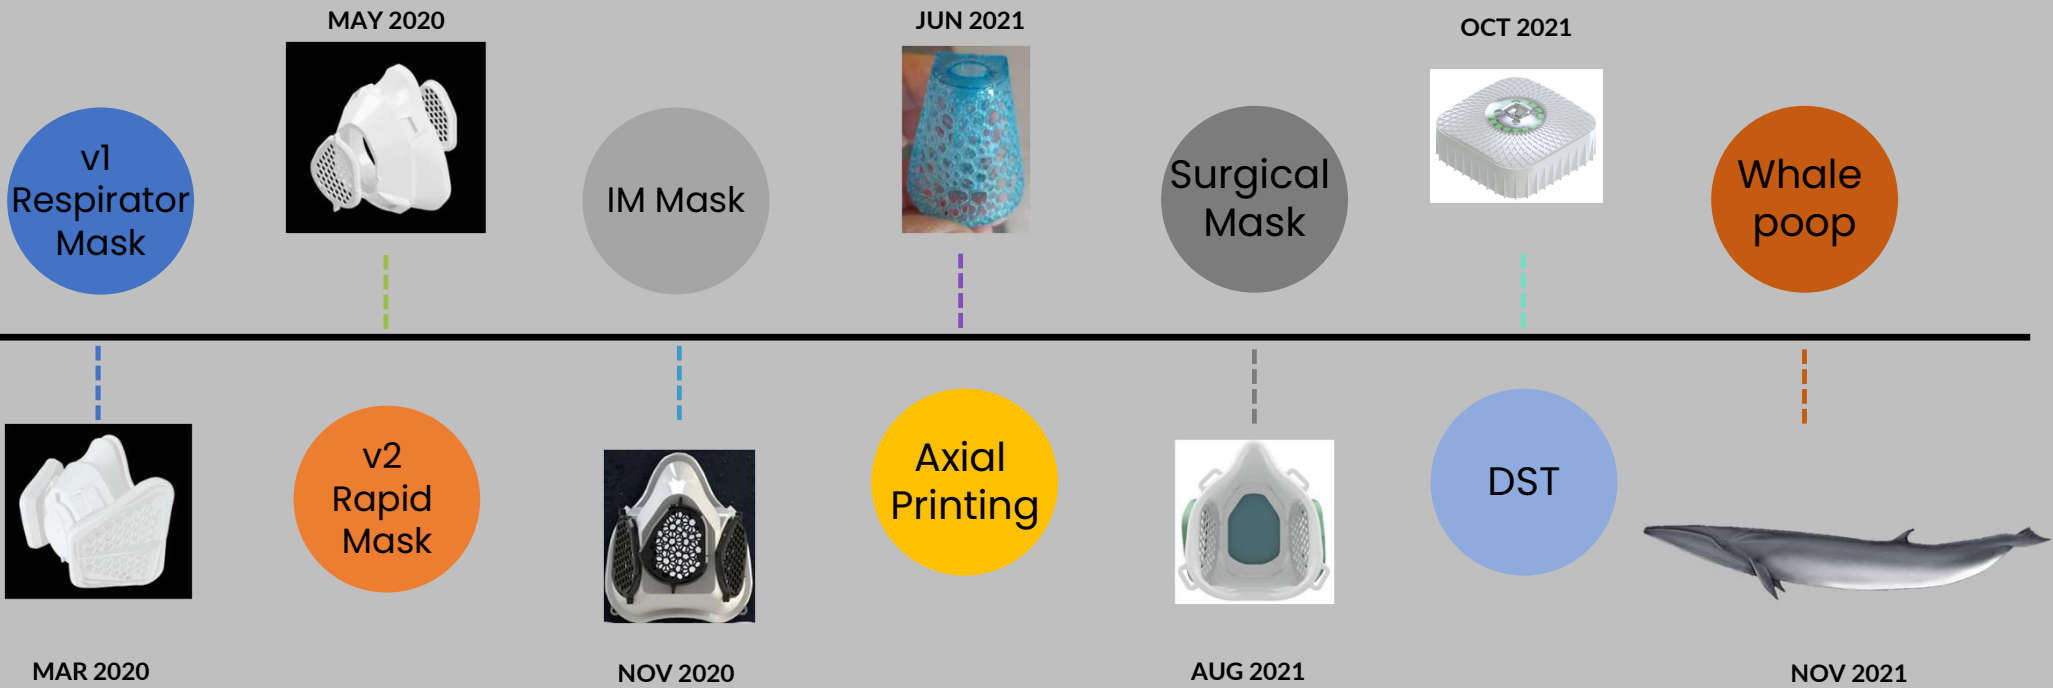

At the same time, the team worked on 3rd world Maker Network supply chain solutions using an entirely new Fluidized Sand material sorting solution.

From the “proof of concept” (both of which were successful), the team decided to pursue the electronic product developed - a Structural Alarm.

The team also developed a concept to help with Climate Change efforts - affectionately called “Whale Poop”, which is a synthesized group of beneficial bacteria that could emulate and replace lost

PRODUCT TIMELINE 2020 - 2021

EVENTS: PLATFORM 2021

As 2020 was “Phase 1” of the AS360 project with the University of Washington and Seattle Children’s Hospital, 2021 was “Phase 2” prepping for launch. It was in 2021, as we completed a majority of the side, that our vision of a cloud-based machine learning and artificial intelligent driven system truly came to be. As the system formed and matured, our belief that the Platform could be used in many different “360” application grew deeper.

In fact, in later 2021, we were asked by David Johnson to attend initial meetings formed to develop solutions within Behavioral Health for Washington State. Jonathan presented an early version of AS360, and with the help of NavigatorCRE we ultimately began development of BH360 - Behavioral Health - a prototype of a larger system that can be used within Washington State (and beyond).

Another implementation and use of the platform that began in 2021, was our work with ACC.eco, or the American Conservation Coalition. The power of big data harnessed by our platform was able to provide data insights to support and challenge assumptions about climate change projects and initiatives set forth by congress and the senate.

The ACC partnership continue to move forward - in the form of

FINANCIAL: 2021

Revenue estimates - unaudited review of our 2021 banking statements.

REVENUE

MAKER MASK ONLINE	\$10,461
SALES/INDIEGOGO	
ROBERTS DONATIONS	\$290,000

TOTAL REVENUE	\$300,461*
----------------------	-------------------

*\$150k in cash was available at the beginning of Jan 2021 , but was received and recognized in December of 2020.

FINANCIAL: 2021

Revenue estimates - unaudited
review of our 2021 banking
statements.

EXPENSES

RENT	\$40,560
TOTAL COGS (MAKER MASK/LABS)	\$84,661
COMPUTER/WEB RELATED	\$15,905
PAYROLL	\$164,050
CONSULTING/SERVICES	\$82,874
CORPORATE SUPPLIES	\$4,191
TOTAL EXPENSES	\$392,243

FUTURE: 2022

360 PLATFORM EFFORTS

INTELLECTUAL PROPERTY AND PATENT EFFORTS

SOCIAL VENTURE EFFORTS

PLATFORM

Our 360 Platform is focused on parent's looking for help, community, and guidance on their children's educational and developmental needs. This will remain our focus for the next few years, if not longer.

PATENTS

The IP and Patent focus for 2022 is the Structural Alarm, Global Warming Solutions, and finalizing any final aspects of Axial Growth Printing. We are on schedule to finish 9 provisional patents for 2022 as well.

PRODUCTS

Our Key IP and Patent efforts will be in testing phases in 2022, allowing us to approach partnerships for 2023 bring to market for the Structural Alarm, and most likely university and research use of Axial Growth Printing.

TEAM: 2022
